

guste ellipticum apice attenuatum, utrinque 5-7-striatum sursum minute hispidulum. Rostrum breve apice paullo albescens. Pappus interior achænio cum pappo brevior mox sordidus aut flavescens exterior ex setis brevissimis in anulum scabrellum coalitis constans.

*Hab.* In Kashmir et provincia adjacente Dras ad 8,000-10,000 ped. alt. leg. T. Thoms.

(12.) *Lactuca macrantha* Hook. f. et Th. sub Mulgedio.

Caulis 1-2 pedalis villosopubescent apice corymbosus. Folia caulina sessilia basi auriculato-amplexicaulia late elliptico-lanceolata inciso-pinnatifida fere pinnata segmentis acutis dentatis supra scabrida aut glabrata subtus glabra. Capitula pauca magna longe pedunculata multiflora cyanea. Phyllaria late oblonga nigrescentia marginibus conspicuis setis ciliata, exteriora sensim breviora. Achænum compressum in facie interiore 1-costatum, in facie utraque striis numerosis obscuris percursum, undique minute hispidum; in rostrum breve concolor attenuatum. Pappus interior achænum fere æquans, sordidus: exterior ex setis brevibus in anulum scabrellum coalitis constans.

*Hab.* In Sikkim, ad 10,000-14,000 ped. alt. mens. Sept.-Nov. florens.

(13.) *Lactuca tatarica* DC. sub Mulgedio VII. p. 248.

Glabrum subglaucescens. Caulis erectus superne paniculatus. Folia pinnatifida oblonga, inferiora runcinata vix petiolata, superiora minus incisa (interdum integra) marginibus serrata. Capitula cylindrica c. 10-flora. Phyllaria interiora late oblonga subacuta glabra stramineo-brunnea exteriora multo breviora ovalia. Achænum compressum striatum læve rostro concolore brevi cylindrico coronatum. Pappus albido-stramineus achænio longior; pappus exterior nullus.

*Hab.* In Kashmir boreali ad 12,000-18,000 ped. alt. mens. Jul.-Aug. florentem leg. T. Thoms. et Stoliczka.

*Distributio.* In Affghanistan leg. Griffith. In Dahuria, Sibiria et regione Caspica.
