

*Saguerus* Steck, *De Sagu* 15. 1757.  
*Gomutus* Correa, *Annales du Museum d'Histoire Naturelle, Paris* 9: 288. 1807.  
*Blancoa* Blume, *Rumphia* 2: 128. 1843.

Type: *Arenga pinnata* (Wurmb) Merrill (*A. saccharifera* Labillardiere). Additional species: *A. Ambong* Beccari, *A. brevipes* Beccari, *A. Engleri* Beccari, *A. gracilicaulis* F. M. Bailey, *A. Listeri* Beccari, *A. microcarpa* Beccari, *A. obtusifolia* Martius, *A. tremula* (Blanco) Beccari (*A. mindorensis* Beccari), *A. undulatifolia* Beccari, *A. Westerhoutii* Griffith, *A. Wightii* Griffith, ?*Didymosperma humile* Lauterbach & K. Schumann, *Saguerus australasicus* H. Wendland & Drude.

**ARENGA section DIDYMOisperma** (H. Wendland & Drude ex J. D. Hooker) H. E. Moore *stat. nov.*

*Didymosperma* H. Wendland & Drude ex J. D. Hooker in *Bentham & Hooker, Genera Plantarum* 3: 917. 1883.

Lectotype: *Arenga porphyrocarpa* (Blume) H. E. Moore. Additional species transferred with confidence follow. Others have been described in *Didymosperma* but are not transferred here because some or all may be no more than forms of the three species listed below. Those not transferred are *Didymosperma borneense* Beccari, *D. hastatum* Beccari, *D. Hookerianum* Beccari and *D. tonkinense* (Beccari) Beccari ex Gagnepain, all perhaps no more than forms of *Arenga caudata*, *D. Horsfieldii* (Blume) H. Wendland ex Salomon, a dubious species, and *D. humile* Lauterbach & K. Schumann. The last appears to be a species of section *Arenga* related to or identical with *A. microcarpa* or *A. gracilicaulis*. *Didymosperma gracile* J. D. Hooker appears distinct on the basis of the description but no material has been studied.

**ARENGA PORPHYROCARPA** (Blume) H. E. Moore *tr. nov.*

*Orania regalis* Blume, *Rumphia* 2: pl. 95. 1837. not *O. regalis* Zippelius (1829).

*Orania porphyrocarpa* Blume in Martius, *Historia Naturalis Palmarum* 3: 187. 1838-39 [ed. 1] and 190. 1849 [ed. 2].
