

(masc.) in spadicebus magnis paniculaeformibus prope caudicis apicem pluribus (per frondes depauperatas interstinctis) denique caudicem terminantibus racemi specie disposita. — Sumatra occid. in prov. Priaman (D.).

(1210). **Plectocomia sumatrana**. Frondes...; spadiceis axis crassus ultropedalis, spathis vaginantibus firmo-coriaceis inferne albido-obductis, ex ore truncato extrorsum brevi-lanceato-productis; rami (spadices proprii) usque 9 (adhuc virginei) stricti cylindrici leviter compressi; spathellae ovatae subrhombeae acuminatae margine fusco irregulariter lacero-fimbriatae, caeterum griseo-subfurfuraceo-obductae. — Aculei adjacent (an frondium?), 5 per series connati, leviter compressi recti, inferne fusco-furfurelli. — Sumatra occid. prope Paya-kombo (T.).

(1211). *Zalacca Wallichiana* MART. *l. c.* — Sumatra occid. prope Panti; et Duku? (T.).

(1212). **Daemonorops longipes**. Ecirrhosus et eloratus; caudex subnullus; petioli graciles bipedales, basi vaginae subcoriaceae nigro-setosae adnati, caeterum subtetragono-compressi usque ad laminam aculeis rectis subulato-compressis ternatis et subverticillatis patentibus pallidis armati; frons perbrevis fere flabelliformi-contracta, rachi circiter semipedali inermi, segmentis utrinque circiter 6 dense approximatis, lanceolatis acutis, membranaceis plurinerviis (3 nervis reliquis validioribus), in nervo medio utrinque, supra in 3 et secus marginem nigro-setulosus, setulis marginalibus superne geminatis, venis transversis perspicuis subflexuosis, majoribus pedem longis, 10—5 lin. latis; — spadix (separatus exstat) parvulus glabratus inermis (spathis omnibus dejectis) alterni-brevi-ramosus, ramis simplicibus vel subramulosis oligocarpis; corollae lacinae sublanceolatae obtusiusculae calyce longiores; drupae (immaturae) ovoideae brevi-obtusum-rostellatae nunc fusculae materie resinosa subobductae, squamis in serie perpendiculari (adjectis summis depauperatis) circiter 10 rhombeis medio depressis, dorso subbigibbis. — Sumatra occid. in prov. Priaman (D.).

(1213). **Daemonorops trichrous**. Frondes...; spadiceis fem. pe-
